CAREER OBJECTIVE: Front-end developer

SUMMARY:

- ✓ I have 1+ year of experience in front-end development of web applications and web sites.
- ✓ I have understanding and knowledge of object-oriented approach, software engineering principles, and
- ✓ concepts.
- ✓ I use best practices of user experience in UI development process.
- ✓ Experienced in responsive web design, mobile first, progressive enhancement approaches.
- ✓ Strong team player with ability to work productively in a team as well as individually.

TECHNICAL SKILLS:

HTML	HTML5
CSS	CSS3, Bootstrap, Sass, Less
JavaScript	Angular (4-5), TypeScript, ES6, jQuery, AJAX, JSON, OOP
Node	RESTful API
NPM	Webpack, Gulp, Grunt
OS	Windows, Linux
DEV	Chrome DevTools, Emmet, Photoshop, WebStorm, VS Code

EXPERIENCE:

ClientPanel

Jan 2018

This app helps to manage the information on the clients to whom we lent money. We can add, update or delete clients, change settings for this app, view all clients all together.

For building this project I used Angular 5 framework, Bootstrap for CSS, Rxjs library for asynchronous functions, font-awesome for better UI navigation of app, Git and firebase for backend.

- ✓ implementation of basic features (responsive web design, form validation)
- ✓ implementation of Angular's features such as routes, services, guards, components.
- ✓ UI tasks
- ✓ Tasks for integration Angular framework with Firebase
- ✓ performance optimization tasks
- ✓ bug fixing

Oshop

Nov – Dec 2017

This is a simple shop application where two roles are implemented: user and administrator.

For building this project I used Angular 4 framework, Bootstrap for CSS, Rxjs library for asynchronous functions, Git and firebase for backend.

- ✓ implementation of basic features (responsive web design, form validation)
- ✓ implementation of Angular's features such as routes, services, guards, components.
- ✓ Implementation services for working with Firebase like authorization, order, product services and other.
- ✓ UI tasks
- ✓ performance optimization tasks
- ✓ bug fixing

Home money

Sep – Oct 2017

This is home accounting app which helps manage home money.

For building this project I used Angular 4 framework, expres.js for building fake backend, ngx-charts framework for building great charts, moment.js for manipulating date, Rxjs library for asynchronous functions, font-awesome for better UI navigation of app, Git and firebase for backend.

- ✓ implementation responsive web design, form validation
- ✓ implementation of Angular's features such as routes, services, guards, components, pipes, custom pipes and directives
- ✓ UI tasks
- ✓ Tasks for integration Angular framework with Firebase
- ✓ performance optimization tasks
- ✓ bug fixing

Travel site

Aug 2017

This web page has fully responsive layout and great UI.

I used jquery and plugin jquery-smooth-scroll, lazysizes for lazyloading and responsive images, autoprefixer and postcss for building css, Waypoints library to make easy execute a function whenever scrolling elements, Gulp as task runner.

- ✓ implementation of responsive web design

- ✓ implementation of docking navigation, smooth and animate scrolling effects
- ✓ performance tasks such as concatenation and minimization files
- ✓ automatization workflow
- ✓ bug fixing
